

Reskilling vs. Upskilling

IN THE CURRENT CYBERSECURITY LANDSCAPE

Upskilling

To teach an employee additional skills

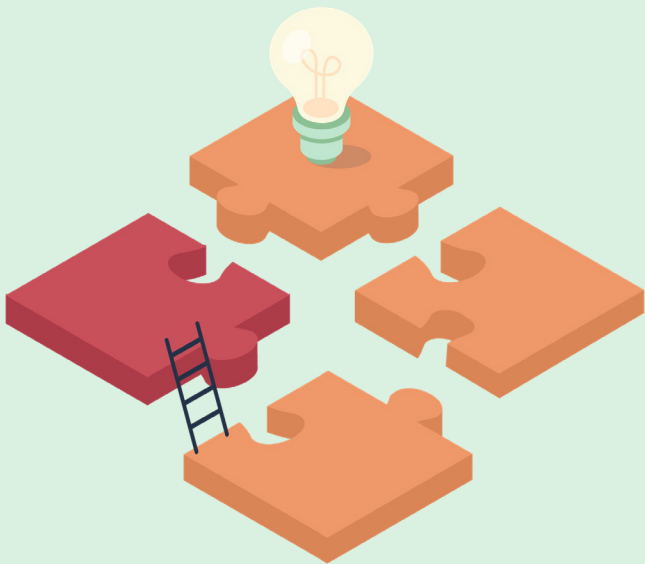

Jobs that require high amounts of digital skills comprise **23%** of positions in technology

95% of cyber incidents are caused by human error

At least **one half** of all employees will need reskilling and upskilling by 2022

More than half of employers reported a cybersecurity skills gap

Reskilling

The process of learning new skills so you can perform a different job.

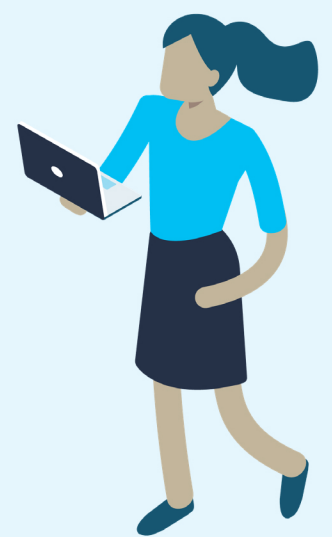

59% of companies say they want to go on a hiring spree

The current number of empty cyber positions worldwide is **4.07 million**, with **561,000** empty positions in North America

Only **30%** of employees at risk of job displacement from technological changes received training in 2019

As of 2016 there has been a **0%** unemployment rate in cybersecurity
